

GIACOMO GUARESI

SOFTWARE ENGINEER

MILAN, ITALY

PORTFOLIO	giacomoguaresi.github.io/GiacomoGuaresi
EMAIL	guaresi.giacomo@gmail.com
GITHUB	github.com/GiacomoGuaresi
LINKEDIN	www.linkedin.com/in/giacomo-guaresi-b76b0812b

.01 SKILLS

→ Full-Stack Development (Frontend & Backend)
→ Cloud Architectures & DevOps (Docker, CI/CD)
→ Embedded Systems & Electronics (Arduino, PCB Design)
→ Programming Languages: C, C++, C#, Python, Java, JavaScript, TypeScript
→ Web Technologies: HTML, CSS, React, Node.js
→ Databases & Tools: MySQL, PostgreSQL, MongoDB, Git
→ Creative Coding & Open-Source Collaboration

.02 ABOUT

Born in Milan in 1998.

From an early age, I developed a strong curiosity about technology and how complex systems work. I spent a lot of time taking apart and rebuilding electronic devices, an aptitude that naturally led me to discover a passion for programming and systems engineering.

Over time, I began to devote myself to software development and electronics, experimenting with circuits, microcontrollers, and code. This passion led me to pursue a degree in Computer Science, where I was able to deepen my understanding of programming, engineering, and electronic design concepts.

Today, I work in full-stack development and cloud architecture, without ever abandoning my interest in embedded systems and PCB design. I am fascinated by both the practical and tinkering aspects and the conceptual and creative aspects, because they allow me to have a complete vision of the projects I work on.

I love sharing my knowledge with the open-source community, collaborating on new ideas, and building innovative solutions. My goal is to combine software, hardware, and creativity to create systems that are both efficient and inspiring.

.03 WORK

2024 - NOW	GINGER ADDITIVE Software Engineer <i>Software development for additive manufacturing, automation, and systems integration</i>
2023 - 2024	INTRE Full Stack Developer <i>enterprise solutions, frontend/backend integration, cloud architectures</i>
2019 - 2023	AM INSTRUMENTS SCADA Programmer & R&D <i>industrial automation, control systems, and pharmaceutical research</i>
2018 - 2019	INTERLEM Full Stack Developer <i>web application development and database management</i>

.04 TOOLBOX

OS	Windows · Linux
LANGUAGES	C++ · C# · Java · Python · JavaScript · TypeScript · PHP
FRONTEND	React · Angular · jQuery · Bootstrap
BACKEND	Node.js · Spring · Django · Flask · .NET
DB	MySQL · PostgreSQL · MongoDB · Redis · Oracle
DEVOPS	Docker · Kubernetes · GitHub · AWS · Azure
